

PARTNERSHIPS AND ON-SITE PROGRAMS

How Can We Bring TSSi to Our City or Organization?

TSSi can deliver on-site, virtual, or hybrid training and organizational support for businesses, municipalities, agencies, workforce programs, nonprofits, and community partners.

Ways to bring TSSi in

- On-site employee or workforce training
- Leadership and management development
- City, agency, or community workforce initiatives
- Customer service and customer experience programs
- Sales, follow-up, and business development workshops
- Professional development series or multi-session training
- Organizational assessments followed by an improvement plan
- Conference, summit, association, or community event workshops

How the process works

1

Submit an inquiry

Tell us about the organization, location, audience, goals, and preferred timing.

2

Speak with a real person

A TSSi team member reviews the request and contacts you to understand the actual need.

3

Needs review

We identify audience size, performance gaps, desired outcomes, delivery format, and any customization required.

4

Proposal and scope

TSSi provides the recommended training or engagement structure, pricing, timing, and deliverables.

5

Deliver and follow through

We conduct the engagement and, when appropriate, recommend follow-up actions to support implementation.

Bring TSSi to your city or organization

Start with a strategy conversation. We will determine whether you need a workshop, training series, assessment, speaking engagement, or a larger organizational solution.
